Project Title: Albertson's Stadium

I want to do this project as 7 differennt pages within one site, using a traditional navigation. Upgrades and additions could fall under the history page if nav gets too busy. Additionally, home record and highest attendances could be consolidated for the same purpose.

History: past namings and usages

Blue Turf: Specific to the unique colored turf

Upgrades and Additions: How the stadium has evolved and improved over the years

Home Record: BSU has a historic record of being great in this stadium

Highest Attendances: The best 10 attendance records for games and their results

Location: Where in Boise the stadium is located and how to get there

Sources: this past will list the sources of images and the wiki page
